

AKG Thermotechnik OHS Policy

AKG Thermotechnology considers compliance with legal, international regulations and customer requirements as the basis of the ISO 45001 Occupational Health and Safety Policy in the facilities where it operates, to continuously improve and to create safe working environments with the participation of employees and employee representatives.

Within the framework of this policy;

- To eliminate the dangers that may arise from the activities,
- To determine and implement protection parameters by reducing health and safety risks,
- To organize training activities for employees, all suppliers and related parties to effectively fulfill Occupational Health and Safety practices,
- It is committed to achieving these goals by planning measurable goals for continuous improvement.
- As AKG Thermotechnology, we aim for a safe, healthy and enjoyable working environment at all stages of our production areas.

In line with this goal, we are committed to the creation of healthy individuals and workforce.

- To determine, implement and enforce the necessary measures for the reduction of occupational accidents and occupational diseases and even for the realization of the "zero work accident" policy,
- To find immediate solutions to near-miss and danger notifications in order to reduce Work Accidents,
- To ensure that precautions are taken with root-cause analysis before the accident occurs, not after the accident occurs,
- To carry out risk assessments with the participation of employees and to reach an acceptable risk level,
- To use safe equipment, personal protective equipment and appropriate technologies for a healthy and safe working environment,
- To hold OHS meetings that will ensure the participation of all levels of the organization in order to improve occupational health and safety practices and to do them correctly,
- We are trying to adopt the culture of occupational health and safety and make it a lifestyle.

In this direction;

- To meet the legal obligations, relevant standards and requirements on occupational health and safety,
- To continuously improve the processes of a proactive (taking precautions before an accident) approach to occupational health and safety and to ensure the sustainability of production by increasing performance,
- In order to adopt our occupational health and safety principles, we declare to develop and continue to develop trainings and activities for our employees and the employees of our suppliers, visitors and interns.

As AKG Thermotechnology, we know that; Strong productions can only be achieved by providing a safe and healthy working environment. Therefore, we are proud to provide this environment in cooperation with our Occupational Health and Safety unit and to satisfy our employees in this respect.
